“The Neuromuscular Prosthesis Utilizing Both Analog and Digital Methods Side-by-Side” - 6.5 CE Hours

Joseph Massad, DDS

(Dental Hygienists, Dental Assistants & Administrative Personnel of registered dentists for this course are invited to attend if space permits. See tuition charge on registration form.)

Course Description

This presentation will detail the procedures for building the foundation for the Neuromuscular Complete Dentures, Immediate Dentures and Implant assisted Dentures. The latest analog procedures from meeting your patient to taking impressions, taking records, esthetic review, and fabrication with the choice of Conventional versus Digital Processing. This process yields the optimal placement of dental implants by doing dual scanning of the prosthesis in the implant planning stage. Many unique tips will be discussed to stay out of trouble and predict the outcome before beginning treatment.

Learning Objectives

1. To implement a digital assessment and examination protocol.
2. To make accurate impressions for edentulous, dentate and implant scenarios
3. To be able to measure the esthetic and functional spaces to assist in determining final esthetics and implant vertical requirements.
4. To understand why we need to make an impression of the edentulous ridges vs. digitally scanning at this point in time.
5. To learn how to determine when to print or mill a denture prosthesis.

About the Speaker

Dr. Massad is in private practice in Tulsa, OK, a Fellow of both the American and the International College of Dentists, a Regent of the International Academy for Dental Facial Esthetics, a member of the American Society of Dental Aesthetics, a Lifetime Member of the American Dental Association and is an honorary member of the American College of Prosthodontics. Awarded the PIONEERS IN DENTISTRY from the American University of Beirut as the third recipient ever bestowed this honor. Dr. Massad was also awarded LIFETIME ACHIEVEMENT AWARD from the American Academy of Implant Dentistry for outstanding vision, dedication, and commitment to the field of implantology. Currently, he holds faculty positions at Tufts University School of Dental Medicine in Boston, Mass; the department of Comprehensive Dentistry at the University of Texas Health Science Center Dental School in San Antonio, TX; Adjunct Associate Professor, Department of Restorative Dentistry, Loma Linda University, Associate Professor in the Department of Prosthodontics, the University of

Tennessee Health Science Center, College of Dentistry, Memphis, Tennessee, Clinical Assistant Professor, University of Oklahoma College of Dentistry, Oklahoma City, OK and the University of Texas Health Science Center, Houston, Texas.
