

2023 CO-CHAIRS

Kenneth C. Brandt, D.D.S.
Lawrence W. Hagen, II, D.D.S.

EXECUTIVE DIRECTOR

Victoria J. Nixon, MSA

A large, stylized graphic of a tooth, rendered in a gradient of blue and purple, serves as a background for the central text. The tooth is oriented vertically, with the crown at the top and the root at the bottom. The text "2023" is written in a large, bold, green font, and "CONTINUING EDUCATION" is written in a bold, black, italicized font below it.

2023
CONTINUING EDUCATION

9200 Montgomery Road, Suite 21A • Cincinnati, Ohio 45242-7797

Telephone: 513-984-3443 • Fax: 513-984-3047

Email: cds@cincinnati-dental.org • Website: www.cincinnati-dental.org

Dear Cincinnati Dental Society Members:

Once again, we are proud and excited to announce our upcoming 2023 continuing education lecture series. Scouting speakers live at the Chicago Midwinter and Hinman Meetings has enabled the committee to bring top notch and informative speakers.

We have a total of five full-day programs in 2023, with a wide diversity of topics to meet the needs of our members and their teams. Don't miss seeing Dr. Hal Crossley. He is always highly requested here in Cincinnati and a marquee speaker nationally. He never ceases to amaze with his comedic style. The remaining slate of 2023 speakers are also highly regarded with topics geared to the general dentist. So, join us for great live CE that provides you with the ability to network with your colleagues that doesn't involve travel expenses.

As a bonus, the full-day lecture series registrants will earn a \$425 discount, or if a 2-day package is selected registrants will save \$50.

Sincerely,

Kenneth C. Brandt, DDS – 2023 Program Co-Chair

Lawrence W. Hagen, II, DDS – 2023 Program Co-Chair and the entire
CDS Program Committee

CE Program Committee Members: (Drs.) Ken Brandt, Matt Corcoran, Larry Hagen, Dennis Murphy, Fred Peck, Nathan Powers, and John Unger.

2023 Postgraduate Course Schedule

6 Hours of CE Credits Each

February 3, 2023
Friday

Speaker: Harold Crossley, DDS
“Clues to Your Patients’ Health: The Most Prescribed Medications and How They May Impact Your Dental Treatment” and Everything You Wanted to Know About Street/ Pharmaceutical Drug Abuse and Their Impact on You, Your Family, and Your Dental Practice” – Delta Hotels by Marriott

March 3, 2023
Friday

Speaker: Alan Budenz, MS, DDS, MBA
“Are Your Patients Comfortably Numb? An Update and Review of Local Anesthesia Techniques and Pharmacology” – Delta Hotels by Marriott

April 21, 2023
Friday

Speaker: Timothy Donley, DDS, MSD
“How to Transition to a Wellness-Oriented Practice Starting Tomorrow” and “A Choreographed Hygiene Protocol” - Delta Hotels by Marriott

October 27, 2023
Friday

Speaker: Brian Novy, DDS
“Offensive Dentistry” and “Nobody Caries” - Delta Hotels by Marriott

November 17, 2023
Friday

Speakers: Jimmie Harper, Jr., DDS and Deepak Krishnan, DDS
“Medical Emergencies in the Dental Office” - Delta Hotels by Marriott

Continuing Education Information and Credits

The continuing education courses are an official activity of the Cincinnati Dental Society. Speaker selection is based on expertise and presentation quality. Speaker participation neither implies nor reflects CDS endorsement. All courses are offered as information only and not as financial, accounting, legal, or other professional advice. Persons attending courses or reviewing handout materials need to consult their own professional advisors for advice. The views and opinions expressed by speakers do not necessarily reflect the policies or positions of the Cincinnati Dental Society. The CDS reserves the right to cancel, reschedule or substitute presentations as deemed appropriate.

Certification of attendance at the courses will be provided for only those who have registered and attended the courses. Registration deadline is the Friday preceding each course. See individual course listings for the number of CE credits.

The Cincinnati Dental Society is an ADA CERP recognized provider approved by the Ohio Dental Association. ADA CERP is a service of the American Dental Association to assist dental professionals in identifying quality providers of continuing dental education. ADA CERP does not approve or endorse individual courses or instructors, nor does it imply acceptance of credit hours by boards of dentistry. The Cincinnati Dental Society designates this activity for CE hours equal to the number of course hours for that class. Concerns or complaints about a CE provider may be directed to the provider or to ADA CERP at www.ada.org/cerp.

General Information

LOCATIONS

The full-day programs will be held at the Delta Hotels by Marriott, 11355 Chester Road, Cincinnati, OH 45246, 513-771-7744.

- * In the event of inclement weather programs will only be cancelled if there is a level 3 emergency. Notice of cancellation will be posted on the website and messages will be left on the Society's Executive Office voice mail and at Delta Hotels by Marriott.

TIME SCHEDULE

8:00 a.m.	Registration
8:30 a.m.	Program with Morning Break
11:45 to 12:30 p.m.	Lunch
12:30 pm	Program Resumes, No Afternoon Break
3:15 pm	Program Ends

REGISTRATION AND LUNCHEON GUIDELINES

FULL SERIES REGISTRANTS: If registered for the complete series, lunch will be provided for **ONLY** those who have checked "Yes" on the registration form or who have contacted the Executive Office for a reservation by the Friday preceding the course. **No lunch will be provided for attendees who have not contacted the Executive Office by the Friday preceding each course and no exceptions will be made.** If a reservation is made and not honored or cancelled by the Friday preceding each course, an additional charge of **\$35** will apply. Your cooperation will enable us to make the necessary arrangements.

INDIVIDUAL COURSE REGISTRANTS: If registered for individual courses (not the series), the necessary arrangements including a reservation for lunch, will be made automatically and you do not need to contact the Executive Office, unless you do not intend to attend the luncheon.

GUIDELINES FOR RECEIVING CONTINUING EDUCATION CREDITS

Individuals will earn six (6) credit hours if he or she arrives before the program begins and stays until the end of the program. Individuals will earn three (3) credit hours if he or she arrives after the morning break, leaves at lunch, or arrives after lunch.

HANDOUTS

Handouts will be available for downloading on the website prior to each course. **Hard copies will not be available on the day of the course.**

CANCELLATION POLICY

For a cancellation refund, written requests must be received no later than three weeks prior to the course. Refunds will be processed two to three weeks after the date of course and will be made via the same method of payment, when possible. The CDS reserves the right to cancel or reschedule any course due to unforeseen circumstances. Registrants will be notified.

VIDEO RECORDING

Video recording is not permitted by members of the audience unless written permission is granted by the sponsor.

Friday, February 3, 2023 at the Delta Hotels by Marriott

“Clues to Your Patients’ Health: The Most Prescribed Medications and How They May Impact Your Dental Treatment” and “Everything You Wanted to Know About Street/Pharmaceutical Drug Abuse and Their Impact on You, Your Family, and Your Dental Practice” - 6 CE Hours

Harold Crossley, DDS

(Dental Hygienists, Dental Assistants & Administrative Personnel of registered dentists for this course are invited to attend if space permits. See tuition charge on registration form.)

“Clues to Your Patients’ Health: The Most Prescribed Medications and How They May Impact Your Dental Treatment”

Using commonly prescribed drugs as a starting point, this presentation explores the control of post-operative dental pain, and the antibiotic(s) of choice for oro-facial infections. What is the new FDA warning about codeine and tramadol in children? Why are NSAIDs more appropriate than opioids for treating post-operative dental pain. What are some concerns about NSAID prescribing in the geriatric population? Is antibiotic prophylaxis required for patients with an orthopedic prosthesis? What is antibiotic stewardship and how does it affect me.? Clinically relevant drug interactions with dental medications will be discussed.

At the conclusion of this course, the attendees will know:

1. How to minimize prescribing opioids for the control of post-operative dental pain
2. How to combine analgesics to maximize their effects.
3. Current recommendations for SBE and orthopedic prosthesis prophylaxis (**they have changed**)
4. A practical and useful pharmacologic approach for treating Oro-facial infections
5. Medications prescribed for Tardive dyskinesia and how they may interact with dental medications.

“Everything You Wanted to Know About Street/Pharmaceutical Drug Abuse and Their Impact on You, Your Family, and Your Dental Practice”

Opioids, alcohol, and marijuana are the big three in most discussions of substance abuse but what about the consequences associated with vaping, synthetic opioids/cannabinoids (K-2), cathinones (Bath Salts), toad licking, nutmeg, mushrooms, and over the counter (OTC) medications. The hallucinogens, amphetamines, and cocaine derivatives on the street are more potent than ever before. This lecture explores the new threats of substances that can be obtained via the internet, new information on the use/abuse of marijuana, the current climate of our opioid crisis, and their influence on you, your family, and your dental practice. This

lecture should be attended by all members of the dental team as well as spouses. **Must be 18 years or older to attend-no exceptions!**

At the conclusion of this course, the attendees will know:

1. The signs and symptoms of commonly abused prescription and illicit drugs in patients and adolescents.
2. What medications to avoid with the suspected drug abusing patient.
3. How to recognize and manage the doctor shopper.
4. How to manage the chemically dependent patient.

About the Speaker

Harold L. Crossley, D.D.S., M.S., Ph.D. is Professor Emeritus at the University of Maryland Dental School. A native of Rhode Island, Dr. Crossley received a Bachelor of Science degree in Pharmacy from the University of Rhode Island in 1964. He later was awarded the Master of Science (1970) and Doctorate degrees (1972) in Pharmacology. The University of Maryland Dental School in Baltimore awarded Dr. Crossley the D.D.S. degree in 1980. The liaison between the classroom and his part-time dental practice produced a practical approach to understanding the pharmacology of drugs used in the dental office. Dr. Crossley has co-authored several articles and four books dealing with a variety of topics within the field of pharmacology. Other areas of expertise include the pharmacology of street drugs and chemical dependency. He serves on the Maryland State Dental Association's Well-Being Committee, is an active member of Phi Kappa Phi, Omicron Kappa Upsilon Honorary Dental Society, the American College of Dentists, International College of Dentists, and an honorary member of the Thomas B. Hinman Dental Society. He was the recipient of the 2008 Gordon Christensen Lecturer Recognition award presented by the Chicago Dental Society and the recipient of the 2012 Award of Distinction presented by the Academy of Dentistry International for his efforts in Continuing Dental Education. He has been a consultant for the United States Drug Enforcement Administration and other law enforcement agencies since 1974. Drawing on this unique background, Dr. Crossley has become nationally and internationally recognized as an expert on street drugs and chemical dependency as well as the clinical pharmacology of dental drugs.

Friday, March 3, 2023 at the Delta Hotels by Marriott

“Are Your Patients Getting Comfortably Numb? An Update and Review of Local Anesthesia Techniques and Pharmacology” – 6 CE Hours

Alan Budenz, MS, DDS, MBA

(Dental Hygienists, Dental Assistants & Administrative Personnel of registered dentists for this course are invited to attend if space permits. See tuition charge on registration form.)

Course Description

This lecture is designed for dentists and hygienists who wish to expand their understanding of the newest pharmacologic agents and delivery techniques of local anesthesia. A wide range of both maxillary and mandibular injection techniques will be reviewed and discussed. Safe and efficient block techniques for complete quadrant anesthesia of the maxilla and mandible, such as the Gow-Gates mandibular division nerve block and the Greater Palatine Canal maxillary division nerve block techniques, will be emphasized in the context of recognizing and anesthetizing accessory nerve pathways. The controversy surrounding the use of 4% anesthetic agents (articaine and prilocaine) for block anesthesia injections will be addressed, and management of possible complications and injuries related to the delivery of oral local anesthesia, such as paresthesia, are discussed. Use of alternative anesthesia modalities, such as topical anesthetic formulations (Oraqix, compounded topicals), the nasal spray delivery local anesthetic (Kovanaze), the anesthetic-reversal agent (OraVerse) and anesthesia buffering systems (OnSet and Anutra), and computerized delivery systems, to obtain either primary or secondary anesthesia are also presented. Dr. Budenz presents practical, useful information that can be directly applied to clinical practice in an informal, interactive style.

Upon completion of this lecture, the participants will:

1. Have a thorough understanding of the pharmacology of available local anesthetic agents, including their advantages, disadvantages, and safety profiles.
2. Have an appreciation of the anatomical basis of numerous local anesthetic injection techniques, and their advantages and disadvantages in practice.
3. Be knowledgeable about multiple techniques for obtaining profound anesthesia of both maxillary and mandibular teeth.
4. Be better able to assess and manage complications that may occur in the delivery of local anesthesia and be better able to avoid them when possible.
5. Be aware of new techniques and armamentarium recently available for the delivery of local anesthetics.

Topics to be covered include:

- ✓ Reasons for Anesthetic Failure; Anatomical, Technical, Psychological, Pharmacological, and Defective agents.
- ✓ An Overview of Local Anesthetic Pharmacology
 - Anesthetic choices

- Mechanism of action of local anesthetics
 - o nasal spray delivery anesthetic: Kovanaze
 - o buffering of local anesthetic: OnSet and Anutra
- Dosage and toxicity
- Vasoconstrictors
- Side effects and contraindications
- Nerve injuries: incidence, causes, and management
 - o prolonged anesthesia, paresthesias, and dysesthesias
- ✓ Dental Anesthesia Techniques: Anatomy, Delivery, and Troubleshooting
 - Mandibular arch anesthesia
 - o Infiltrations
 - o inferior alveolar nerve block
 - o lingual nerve block
 - o mental (and incisive) nerve block
 - o long buccal nerve block
 - o mylohyoid nerve block
 - o complete mandibular division of trigeminal nerve blocks
 - Gow-Gates technique
 - Vazirani-Akinosi technique
 - Modified Akinosi techniques
 - o comparison of mandibular block techniques
 - Maxillary arch anesthesia
 - o Infiltrations
 - o anterior (and middle) superior alveolar nerve block (both infraorbital and palatal approaches)
 - o posterior superior alveolar nerve block
 - o nasopalatine nerve block (conventional and palatal approaches)
 - o greater palatine nerve block
 - o complete maxillary division of trigeminal nerve blocks
 - Posterior Superior Alveolar (lateral) approach
 - Greater Palatine Canal (medial) approach
- ✓ Alternative Methods of Anesthesia
 - Topical anesthetics
 - Intraosseous injections: Stabident, X-tip, Intraflow, Hypo needle
 - Intraligamentary injections
 - Computer-controlled anesthesia: The Wand/STA, Comfort Control Syringe
 - Anesthetic reversal: OraVerse
- ✓ Possible Complications of Injection Procedures and Their Management
 - Hematoma - arterial vs. venous
 - Nerve paresthesia
 - Facial blanching and/or spasm
 - Transient facial paralysis
 - Other unusual side effects

Dentists and dental hygienists attending this presentation should expect to return to their practices with an increased appreciation for the causes of local anesthesia failures and the knowledge to overcome these failures, and a greater sense of ease in recognizing and managing unexpected side effects and complications of local anesthetic injections. This will reduce the anxiety level of the practitioner and bring the practice another step closer to pain-free dentistry for each patient.

Friday, April 21, 2023 at the Delta Hotels by Marriott

“How To Transition to a Wellness-Oriented Practice Starting Tomorrow” and “A Choreographed Hygiene Protocol” 6 CE Credits

Timothy Donley, DDS, MSD

(Dental Hygienists, Dental Assistants & Administrative Personnel of registered dentists for this course are invited to attend if space permits. See tuition charge on registration form.)

“How to Transition to a Wellness-Oriented Practice Starting Tomorrow”

Today's dentistry must be about more than cleaning or saving patients' teeth. We can help patients achieve better oral and overall health. Doing so opens an entirely new approach to educating and motivating patients to follow through with our treatment recommendations. This is not simply another oral-systemic link course. In this course you will learn how to use what we can say for sure about the effects that oral inflammation can have on specific systemic diseases to improve patient outcomes, practice incomes and personal job satisfaction. More importantly, you will leave with the materials necessary to immediately incorporate a wellness approach into your existing practice routines.

This course presents an entirely new wellness narrative for dentistry based on current science. Inherent in this wellness approach is solid justification not just for periodontal services, but for all the services that you provide in your office.

You will benefit, your practice will benefit, and your patients will benefit.

Learning Objectives

1. Understand the new goal of dental care and how to frame treatment recommendations within this goal.
2. Learn how to get everyone in the office on the same page.
3. Develop effective methods to consistently communicate a better message to patients.
4. Develop a workable in-office “priority patient” approach.

“A Choreographed Hygiene Protocol”

Almost all of dentistry is bought and sold during the hygiene visit. Yet too many of us get caught up in the typical outdated recall mindset. There are now important reasons to help patients do more than just keep their teeth. The new goal of dentistry gives doctor and hygienist new opportunities to identify dental needs in patients and then motivate them to follow through. Doctor and hygienist will leave this course with a step-by-step exam protocol which makes it as easy as possible for both to reach their practice goals.

Learning Objectives

1. Understand the new goal of dental care and learn how to communicate it effectively to every patient.
2. How to use long-term inflammation reduction and bone preservation to create patients who want a dentition that is:
 - ✓ Functional
 - ✓ Esthetic
 - ✓ Inflammation free
 - ✓ Maintainable
3. Maximize the "moment of truth" when doctor comes into the room
 - ✓ Making the hygiene routine efficient
 - ✓ Four things doctors need to know immediately upon entering the room
 - ✓ Powerful questions to ask patients to set the stage
 - ✓ What to look for and what to say when you find it.

About the Speaker

Timothy Donley DDS MSD is currently in the private practice of Periodontics and Implantology in Bowling Green, KY. Dr. Donley is a sought-after speaker whose courses are always highly rated. His forte lies in taking the latest research and packaging it in a way that makes sense. Dentistry Today recently listed him among its Leaders in Continuing Education. Dr. Donley co-authored the first-ever comprehensive textbook on ultrasonic debridement. He lectures and publishes frequently on topics of interest to clinical dentists and hygienists. He is the director of Collaboration for Change 2030 which is an international effort to co-create a better way forward for dentistry and dental hygiene.

Continued from Page 7

About the Speaker

Dr. Budenz is Emeritus Professor in the Department of Biomedical Sciences and in the Department of Diagnostic Sciences at the University of the Pacific, Arthur A. Dugoni School of Dentistry in San Francisco, California. He received his graduate degree in Anatomy from the University of California, Los Angeles, and his dental degree from the University of California, San Francisco. He has more than 40 years of general practice experience in San Francisco, has served as a general dentistry clinical instructor, a clinical group practice administrator, and as Chair of the Department of Diagnostic and Emergency Services at Pacific. He has also taught anatomy courses at Pacific since 1984. He has lectured internationally on local anesthesia, oral medicine, cariology, and the anatomical basis of dentistry topics, and every year since 2005, he has been recognized as an Annual Leader in Continuing Dental Education by "Dentistry Today". Due to his background, Dr. Budenz is well qualified to combine basic anatomical instruction with practical clinical application for dentists and hygienists alike.

Friday, October 23, 2023 at the Delta Hotels by Marriott

“Offensive Dentistry” and “Nobody Caries” - 6 CE Credits

Brian Novy, DDS

(Dental Hygienists, Dental Assistants & Administrative Personnel of registered dentists for this course are invited to attend if space permits. See tuition charge on registration form.)

“Offensive Dentistry”

Let’s face it, sitting through a lecture about dental caries or caries risk assessment isn’t appealing (in fact it sounds downright boring). However, the science of clinical cariology is beginning to have an impact on restorative techniques and technology. *Streptococcus mutans* has more to fear than a rheostat now that we’re armed with salivary diagnostics and bioactive materials.

At the end of this course, participants should be able to:

- Intervene medically in the caries process.
- Control patient caries risk with focused therapeutics.
- Design restorations to minimize recurrent decay.
- Improve the prognosis of restorative treatment.

“Nobody Caries”

Sometimes it seems as though our patients don’t grasp the basic concept of home care. Other times our patients with impeccable hygiene develop rampant decay and we feel helpless because we can’t figure out what’s going on. The mouth is a remarkable environment that cariologists are finally beginning to understand, and so can you. Learn everything you didn’t know about plaque and the amazing organisms that make the mouth a wonderful place to work.

Learning Objectives

- Explain the mixed ecological approach to caries causation
- Apply Evidence Based and novel preventive therapies
- Quickly identify high caries risk patients before they develop disease
- Stop “watching” lesions and see them get smaller

About the Speaker

Dr. Nový is the Chief Dental Officer of the Alliance Dental Center in Quincy, Massachusetts. The California Dental Association Foundation presented him with the Dugoni Award for “Outstanding contributions to dental education,” and his office was the first to receive the title, “American Dental Association Adult Preventive Care Practice of the Year.” He served on the ADA Council of Scientific Affairs from 2010 to 2014, and as chair of the CAMBRA coalition. In 2016 he was appointed the consumer advocate on the United States Food and Drug Administration Dental Products Panel.

Friday, November 17, 2023 at the Delta Hotels by Marriott

**“Medical Emergencies in the Dental Office” – 6
CE Credits**

Jimmie Harper, Jr., DDS and Deepak Krishnan, DDS

(Dental Hygienists, Dental Assistants & Administrative Personnel of registered dentists for this course are invited to attend if space permits. See tuition charge on registration form.)

Course Description

While medical emergencies are relatively rare in a dental practice, the consequences can be devastating. Anticipation and preparation are key to successful outcomes. In this presentation, we will discuss how underlying medical conditions combined with stress can precipitate specific emergencies, as well as the recognition and management of common medical emergencies that could occur in a dental practice. We will also review emergency medications that may be useful in the management of medical emergencies

Learning Objectives

1. The eyes never see what the mind does not know! Identify common emergencies.
2. Create an emergency action plan in the office.
3. Learn to manage common emergencies in the dental office.
4. Learn to engage in emergency drills in the office.

About the Speakers

Jimmie Harper, Jr., DDS - Dr. Harper completed his dental training at the Ohio State University in 1979, followed by three years of active duty in the USAF as a General Dental Officer. He returned to the Ohio State University in 1982 to complete a four-year residency in Oral & Maxillofacial Surgery. After serving an additional four years in the USAF, Dr. Harper returned to Cincinnati where he has been in private practice for the past 33 years. Dr. Harper has been actively involved in resident education at the University of Cincinnati since 1990. He currently serves as a Volunteer Assistant Professor in the Division of Oral & Maxillofacial Surgery where he teaches a Medicine/Anesthesia course and a Surgical Anatomy course. Dr. Harper currently serves on the AAOMS Committee on Anesthesia and is a facilitator for the AAOMS Office Based Emergency Airway Management (OBEAM) Simulation Course. Dr. Harper also teaches the annual Medical Emergencies for the Dental Hygienist Course for the Cincinnati Dental Society

Deepak Krishnan, DDS – Dr. Krishnan is the chief of Oral Maxillofacial surgery at University of Cincinnati. He is an associate professor of Surgery at the College of Medicine there, where he teaches and practices. Dr. Krishnan obtained his dental degree from Bangalore University, India and trained in Oral and Maxillofacial Surgery at Emory University's College of Medicine in Atlanta, Georgia. Upon completion of the residency. He pursued further fellowship training in Oral & Maxillofacial Surgery focusing on orthognathic surgery at Dalhousie University, Halifax, Canada.

Dr. Krishnan currently serves on the American Association of Oral and Maxillofacial Surgeons (AAOMS) Committee, on Anesthesia (CAN) and on the Committee of Education and Training (CET). He is a senior examiner for the American Board of Oral and Maxillofacial Surgery (ABOMS), a Fellow of the American College of Surgeons (ACS), and is the chief editor of Face to Face, the newsletter of the International Association of Oral and Maxillofacial Surgeons (IAOMS).

2023 CDS Member Event Schedule

February 13, 2023 (Monday)

"Burnout & Recovery"

Location: Cooper Creek Event Center

Diane Kinsella, Executive Director with Journey to Hope
(Excellent for you, your spouse, and entire staff!)

March 13, 2023 (Monday)

Dr. Nelson Diers (Orthodontist), Topic – TBD

Location: Maggiano's Little Italy

April 13, 2023 (Thursday)

Dr. Khurram Khan, (Oral Surgeon), Topic – TBD

Location: Kenwood Country Club

October 9, 2023 (Monday)

Dr. Richard Cohen (Chiropractor), Topic – TBD

Location: Maggiano's Little Italy

The Cincinnati Dental Society
Announces the
New Grad Discount Program
for Continuing Education 2023 Programs

Cincinnati Dental Society members who graduated from dental school in 2020, 2021, and 2022 will now enjoy a **40%** discount on the full-series, two-day or one-day continuing education programs in 2023!

The full series registration fee is \$1,200

New grads will pay only \$720.00 for five (5) full day continuing education programs.

The two-day registration fee is \$600

New grads will pay only \$360

The one-day registration fee is \$325

New grads will pay only \$195 per course

To take advantage of this special offer, please complete the section below and return with a completed “2023 Registration Form” (located inside the enclosed “2023 Continuing Education” booklet) to the Cincinnati Dental Society’s Executive Office at:

9200 Montgomery Rd., #21-A, Cincinnati, OH 45242.

Dentist _____

Graduation Year _____

There is a deadline to this offer,
so don't delay and register today!

Deadline is January 13, 2023
